

Coffman Encourages Coloradans To Speak Out

(WASHINGTON) – Rep. Mike Coffman (R-Aurora) today encouraged all Coloradans concerned about the direction of the nation to participate in America Speaking Out. Coffman's call to action comes following the launch of an unprecedented new initiative that will allow the American people to engage in the process of building a new policy agenda for America.

Through town hall meetings and online at www.AmericaSpeakingOut.com, all Americans can submit ideas on a broad range of important issues and have each of those ideas debated and discussed in a public and transparent forum.

"Coloradans, and all Americans, are sick and tired of Washington not listening. They are sick of out of control spending, out of control deficits, and out of control government bailouts and takeovers. This new initiative is about doing what Washington has not been doing, and that is following the will of the people and listening to what they have to say. I strongly encourage every Coloradan to participate by going to the website and attending an America Speaking Out town hall" Coffman stated.

"Republicans have principles built on limited government, fiscal accountability, and a strong national defense, but we firmly believe the very best ideas come from America and this new initiative is the megaphone," Coffman continued.

America Speaking Out is an effort of House Republicans to engage the American people and solicit their ideas and priorities for the creation of a new policy agenda for the nation.
